# When the Boy Tire Maker Married the Girl Tire Maker, What Did Everyone Say?

Do each exercise and find your answer at the bottom of the page. Write the letter of the exercise in the box above the answer.

1. Suppose you roll a regular 6-faced die.

(A) How many equally likely outcomes are there?

(E) If you roll the die once, what is the probability of rolling a 3?

(H) If you roll the die 60 times, about how many times would you expect to get a 1?

(I) If you roll the die 300 times, about how many times would you expect to get a 5?

2. A spinner is shown at the right for which each outcome is **not** equally likely.

(E) If you spin the spinner once, what is the probability that it will stop on A?

(A) If you spin the spinner once, what is the probability that it will stop on B?

(T) If you spin the spinner 50 times, about how many times would you expect it to stop on A?

(Y) If you spin the spinner 80 times, about how many times would you expect it to stop on C?
3. Find each probability if you choose one marble at random.

(E) P(black)   (S) P(striped)

(A) P(not black)   (E) P(not white)

(R) P(black or white) (M) P(yellow)
4. Solve.

(N) If you flip a coin 150 times, about how many times would you expect to get heads?

(K) If you randomly pick a date in April, how many equally likely outcomes are there?

(C) The letters a, e, i, o, u, and y are vowels. If one letter of the alphabet is chosen at random, what is the probability it is a vowel?

(P) A magician asks you to pick a card, any card, from a standard deck of 52 cards. What is the probability of picking an ace?

25	10	$\frac{9}{10}$	20	$\frac{1}{8}$	0	6	30	$\frac{1}{2}$	$\frac{2}{13}$	$\frac{7}{10}$	$\frac{1}{5}$	75	50	$\frac{3}{13}$	$\frac{1}{6}$	32	$\frac{3}{5}$	$\frac{1}{13}$	$\frac{1}{4}$	$\frac{2}{5}$	$\frac{3}{10}$
