

Chapter 7 Quiz

Name: _____ Per. _____

1. Name the set of ordered pairs represented by the mapping diagram shown below.

- A. $\{(13,1), (3,17), (17,5), (7,19), (23,11)\}$
- B. $\{(1,13), (17,3), (5,17), (19,7), (11,23)\}$
- C. $\{(1,13), (3,17), (5,17), (7,19), (11,23)\}$
- D. $\{(13,1), (17,3), (17,5), (19,7), (23,11)\}$

2. Which of the following mapping diagrams represents the relation. $\{(4,6), (3,8), (3,7), (9,9), (4,1), (5,12)\}$

Is the relation a function?

- No
- Yes

3. Determine whether the following relation represents a function. $\{(5, -4), (3, -3), (5, -6), (8, -1)\}$

- No
- Yes

4. Draw a mapping diagram to represent the relation shown in the table. Then decide if the relation is a function.

Input	Output
24	1
32	7
24	12
32	16

- No
- Yes

Determine whether the graphs are a function.

- No
- Yes

- No
- Yes

7. The value of y is one less than x. Represent this relationship using a table, an equation, and a graph.

x	y	Ordered Pair (x,y)
0	-1	(0, -1)
1		
2		
3		

Equation: $y =$

8. Use the graph to make a table of values for the function.

Complete the table.

x	y
-3	<input type="text"/>
<input type="text"/>	-2
1	<input type="text"/>
<input type="text"/>	4

9. Make a table of values for the function $y = 3x$

x	y
-5	<input type="text"/>
-2	<input type="text"/>
0	<input type="text"/>
2	<input type="text"/>
5	<input type="text"/>

10. Graph the relation. Then determine if it is a linear function. $\{(1,3), (2,3), (3,7), (4,9), (5,11)\}$

- No
 Yes

11. The graph of the set of ordered pairs represents a linear function. Find the rate of change.

$\{(1,4), (2,6), (3,8), (4,10)\}$ Rate of change =

12. Does the relation represented by the table represent a linear function?

Input	Output
1	7
2	9
3	11
4	13
5	15

- No
 Yes

13. Decide whether each function is linear or nonlinear.

Function I is:

Function II is:

14. Justin opens a savings account with \$3. He saves \$5 each week. The table represents his account balance. Decide whether the table represents a linear function or a nonlinear function.

Justin's Savings Account						
Week	0	1	2	3	4	5
Money in Account	3	8	13	18	23	28

15. Decide whether the table represents a linear function or a nonlinear function.

Input	Output
0	7
1	14
2	23
3	34
4	47
